One Thing - One Direction

```
 C                 G         C
I've tried playing it cool
 C               G         C
But when I'm looking at you
 C       G         C
I cant never be brave
       Am          G      C
'Cause you make my heart race

 C       G         C
Shot me out of the sky
 C       G         C
You're my kryptonite
 C         G         C
You keep making me weak
       Am        G         C
Yeah, frozen and can't breathe

 C                     C
Somethings gotta give now
          C                     C
'Cause Im dying just to make you see
      C                 C
That I need you here with me now
       Am           G       C
'Cause you've got that one thing

   C                       G         C
So get out, get out, get out of my head
  C                     G       C
And fall into my arms instead
  C                 G           C
I don't, I don't, don't know what it is
    Am         G       C
But I need that one thing
    Am           G       C
And you've got that one thing

 C             G       C
Now I'm climbing the walls
 C             G       C
But you don't notice at all
 C     G         C
That I'm going out of my mind
 Am       G         C
All day and all night

 C                     C
Somethings gotta give now
```

```
            C                         C
'Cause Im dying just to make you see
       C                   C
That I need you here with me now
          Am          G        C
'Cause you've got that one thing

    C                           G        C
So get out, get out, get out of my head
   C                  G        C
And fall into my arms instead
   C                  G          C
I don't, I don't, don't know what it is
      Am          G        C
But I need that one thing

    C                           G        C
So get out, get out, get out of my mind
   C                  G        C
And come on,come into my life
   C                  G          C
I don't, I don't, don't know what it is
      Am          G        C
But I need that one thing
      Am              G        C
And you've got that one thing

      Am          G        C
You've got that one thing

    C                           G        C
Get out, get out, get out of my head
    C                 G        C
And fall into my arms instead

     C                          G          C
So get out, get out, get out of my head
    C                 G        C
And fall into my arms instead
    C                 G            C
I don't, I don't, don't know what it is
      Am          G        C
But I need that one thing
```
