## I'll Take The Rain - Rem

```
INTRO: Am Am Am Am
Am
The rain came down
The rain came down
The rain came down on me
the wind blew strong
and summer's song
it fades to memory
Αm
I knew you when
I loved you then
                  G
in summer's yawn, now hopeless
you laid me bare
and marked me there
the promises we made
                  Am
                                      Εm
I used to think, as birds take wing,
they sing through life, so why can't we?
                   Am
                                        Em
we cling to this, and cliam the best
if this is what you're offering
                                        Em
I'll take the rain, I'll take the rain
Αm
The nighttime creases
summer schemes
and streches out to stay
the sun shine downs
you came around
```

G
Αm
you loved the easy days
Αm
But now the sun
the winters come
I wanted just to say
that if I hold
I'd hope you'd fold
            G
and open up inside, inside of me
                  Am
                                      Em
I used to think, as birds take wing,
they sing through life, so why can't we?
                                       Εm
we cling to this, and cliam the best
if this is what you're offering
I'll take the rain, I'll take the rain
                     Αm
                            Εm
I'll take the raaaaaaiiiinn

Αm
This winter's song
I'll sing along
I've searched its still refrain.
I'll walk alone
if given this
take wing, and celebrate the rain
                                     Εm
                 Am
I used to think, as birds take wing,
they sing through life, so why can't we?
